

Installation for a Skimmer on an Above-Ground Metal Pool with a Factory Pre-Cut Hole:

1. Install vinyl liner in assembled pool.
2. Position Double Gasket through square hole in the pool wall. The gasket should surround the edges of the pool wall.
3. Position face plate. Weir Door pivot pins should be positioned on the bottom.
4. Attach the face plate by lining up through the liner with the gasket and attach to the skimmer body on the outside of the pool.
5. Cut out vinyl liner along inside edges of the face plate opening.
